## Application for Telecommunications Tower Construction/ Collocation/Modification

### Zoning Permit Submittal Requirements/Checklist:

- Completed Telecommunications Tower Construction/Collocation/Modification Application Form
- Project Narrative
  - A signed statement briefly describing the project and explaining why the site was selected and the objectives of the new tower, collocation or modification (eg., filling coverage gap, installing 4G equipment, etc.)
- Complete set of construction / site plans, including the minimum:
  - Detailed site plans showing property boundaries, access roads, lease area, and tower location
  - Detailed elevation plans showing height of the tower (and any proposed extension, if applicable), existing and proposed antenna arrays (label carriers and height on tower), vacant collocation spots, existing and proposed ground equipment shelters and/or cabinets
  - Existing and proposed landscaping or screening features
  - Must be sealed with a Wisconsin Professional Engineers' stamp
- Radio Frequency propagation maps
  - Maps depicting applicants' coverage both before and after installation / modification of equipment
- Inventory & maps of existing towers in the area
  - Map & label existing towers within a two mile radius of the proposed site.
- Structural Analysis of Tower
  - Analysis should include a summary statement indication that the tower can accommodate the proposed modification or collocation and complies with all applicable engineering and construction standards. A signed / stamped statement by a professional engineer licensed in Wisconsin regarding the structural capacity and integrity of the tower may be submitted in lieu of a copy of the complete structural analysis.
- Other Information
- Application Fee
